

Teknoflor® Naturescapes HPD™

Bio-polyurethane Commercial Resilient Sheet Flooring

Milwaukee, WI -- Teknoflor® Naturescapes HPD™ was the first hard surface resilient flooring product and is currently the only Resilient Sheet product to be Petal Certified by The International Living Future Institute's Living Product Challenge, a product certification program, advocacy tool, and philosophy that defines the most advanced measure of sustainability and transparency in product manufacturing today. The Challenge is comprised of 20 imperatives spread across seven petals (performance categories): Place, Water, Energy, Health and Happiness, Materials, Equity and Beauty.

Naturescapes HPD is also the brand's first bio-polyurethane sheet good made from ecuran, an organically derived composite material processed from plant based oils such as castor oil and naturally occurring minerals such as chalk. This resilient sheet flooring product has all the advantages of resilient sheet vinyl - durability, easy maintenance and versatility - but without the vinyl.

Naturescapes HPD does not contain any chemicals that are classified as Carcinogens, Mutagens and Reprotoxics (CMRs) and does not introduce risk of exposure to those who are involved in the manufacture, use, and disposal of the product, making it safe for human health. The maintenance process requires no waxing or buffing, which aids in the decrease of airborne bacteria and chemical run-off that often results from standard waxing and buffing.

Additionally, Naturescapes HPD's organic composite material offers inherent stain resistance without added chemicals or solutions and provides a seamless flooring solution to minimize collections of bacteria and optimize sanitation and safety.

The biophilic inspiration of Naturescapes HPD helps to create a tranquil healing environment through use of soft natural hues and organic visuals. The product offers 24 beautiful designs in three forest-inspired patterns, which can be used independently or together to help create efficient yet stress-reducing environments through wayfinding and nature-inspired design.

Teknoflor is proud to provide a non-vinyl, seamless-flooring product that provides optimal flooring solutions for the healthcare environment and that enriches our connection to the natural world.

About Teknoflor

Teknoflor is a major manufacturer and distributor of high-performance flooring products with a strong focus on Healthcare, Senior Care, Government, Corporate, Hospitality, Retail and Education environments. Teknoflor supplies floors that provide durability and state-of-the-art technology with a strong emphasis on no-wax, no-buff commercial resilient flooring including heterogeneous and homogeneous sheet vinyl, tiles and planks, and non-vinyl flooring.
